
The Code for Construction Product Information

Amanda Long
Chief Executive, CPI Ltd

CCPI and Independent Verification

- **Developed through substantial industry consultation**
- **11 Clauses of the CCPI covers:**
responsibility for product information, to accuracy of and clarity of performance claims made, product information management, product related competency, guaranties, warranties etc.
- **CCPI Independent verification** provides greater confidence that the **Product Information** published by a construction product manufacturer for a **specific product set** is **clear, accurate, up-to-date, accessible and unambiguous.**
- **4 Clause CCPI for Merchants and Distributors** who play a critical role in the supply ecosystem of construction products and managing product information.
Launch announcement DECEMBER!

What is CCPI Manufacturers Product Set Product Information Verification?

A confirmation that the **Product Information published by a construction product manufacturer for a specific product set is clear, accurate, up-to-date, accessible and unambiguous.**

The verification process **does not**:

- Test any products
- Set, approve or recommend construction product standards
- Recommend any management system(s) or manufacturing controls
- Make any assessment of a construction products performance
- Recommend any changes to construction products

The verification process **does**:

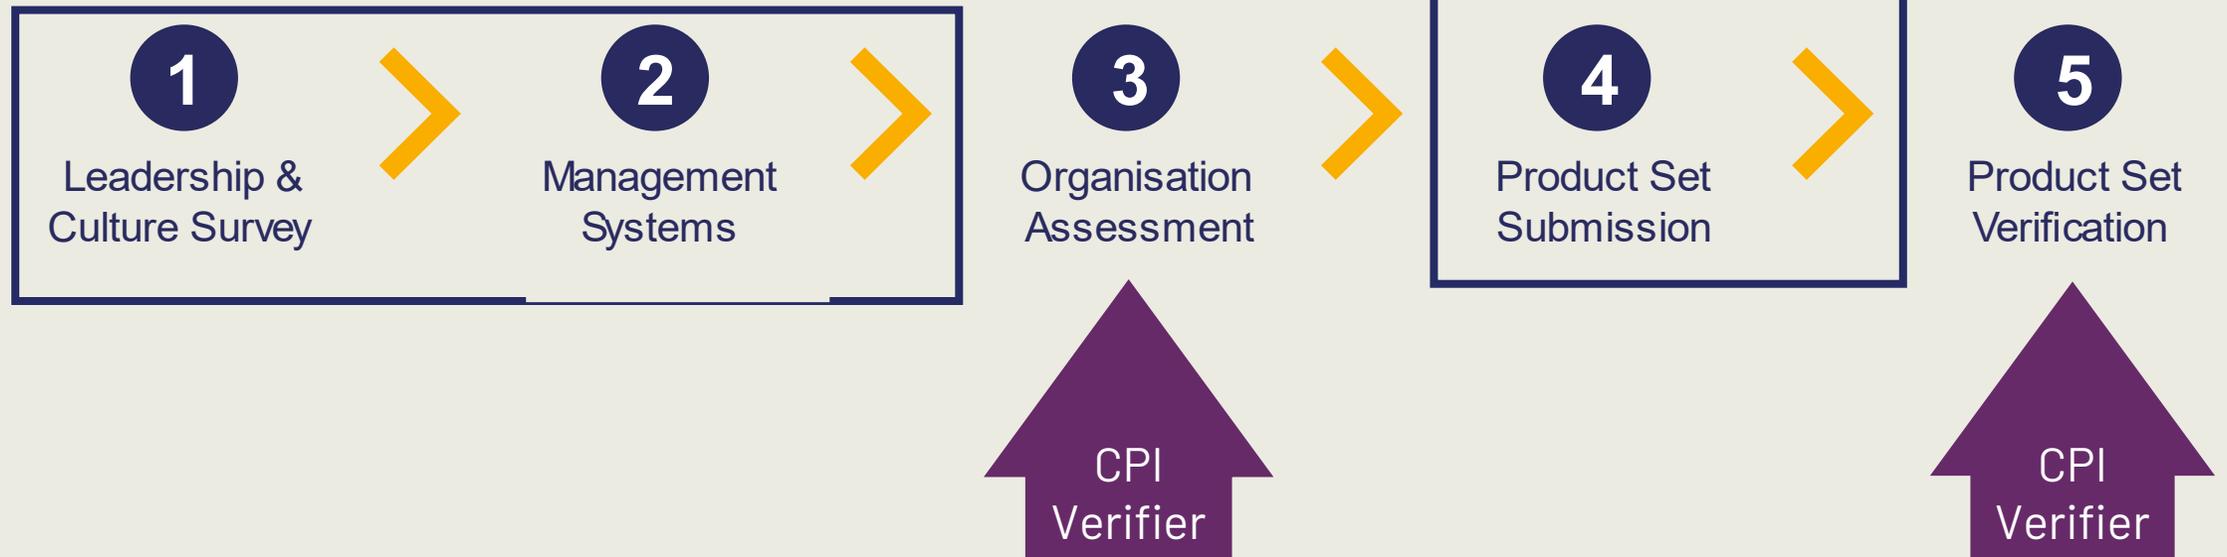

- ✓ Check the company's **leadership, culture and ethical practices**
- ✓ Check the **Product Information** management systems against the 11 clauses of the Code
- ✓ Corroborate that **Product Information published (for a specific product set under verification)** is clear, accurate, up-to-date, accessible and unambiguous
- ✓ Check performance statements made for **Product Information published for a specific product set under verification** against formal Certification, Classification and/or Testing done by third parties

Summary of Approach to CCPI Manufacturers Product Set Verification

Manufacturer registers with CPI Ltd. (at a brand level)

Note: there is no recognition for Registration for CCPI verification. **The CCPI Mark may only be used with verified products.**

Support for CCPI

Independent Review of the Construction Product Testing Regime - Paul Morrell OBE and Anneliese Day KC

- The report references the CCPI multiple times and sets out recommendations to the government and industry on its uptake. (See Recommendation 15 , page 139)

Construction Product Regulator (OPSS) – Geoffrey Brown, Assistant Director

- Building Safety Conference, 23rd March stated *'As the regulator we are happy to support the Code... We like the emphasis on leadership, culture and ethics... We like the 11 [clauses], they're coherent and provide a clearly defined path to clear, accurate, up to date, accessible and unambiguous Product Information'*.

DLUHC Construction Product reforms and Building Safety Act secondary legislation -

- Upcoming construction product reforms by Government, third-party assurance is being considered to be mandated in relation to product information and CCPI is a model example of how to achieve this.

Dame Judith Hackitt and Industry Safety Steering Group – ISSG meeting September 4th

- Strongly and positively supported CCPI and its work, seeking CCPI to scale up and become an industry norm

Summary update on companies progressing & next steps

- @50 companies either already through or in process for the Organisational Assessment
- **@42 product sets (including @624 products) product information either verified or in process**
- **CCPI Demand-Side Supporters Pledge** announced!
- **Merchant and Distributors 4 Clause Code and Assessment process launching early December**

Some examples of first product sets verified

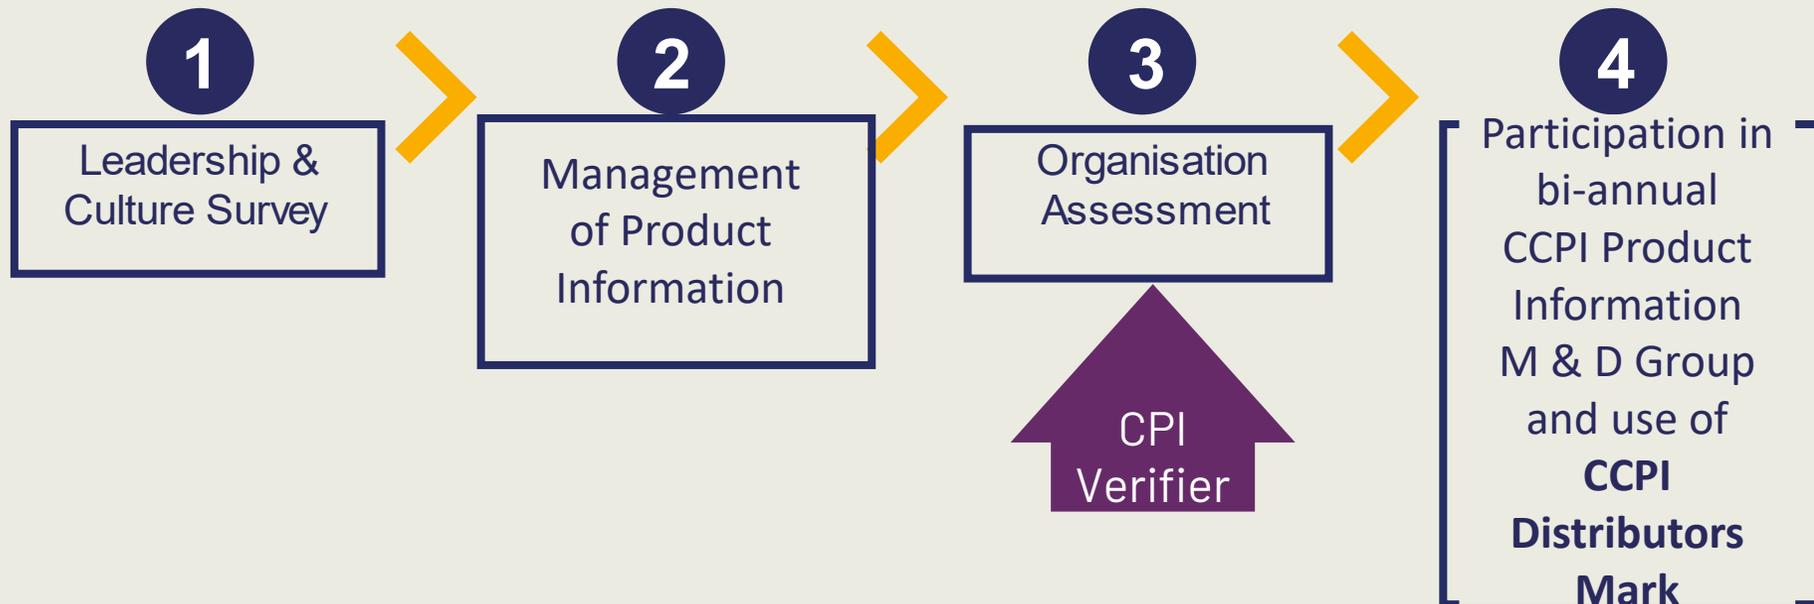

- VJT Resin Injection Mortar (**VJ Technology**)
- Masonry Support (**ACS Steel**)
