Course overview

The Earth's climate is changing faster today than ever before in the history of our species – and human actions are the main reason why. In November 2020, the government published its 10-point plan for a Green Industrial Revolution setting out a path to Net Zero by 2050. Legislation is changing in a drive to ensure emissions are reduced. In our sector you will hear talk of CO2nstructZero. More than ever before customers are choosing to support businesses that are doing their bit to reduce emissions to create a better future.

It can all seem daunting and difficult to know where to start; but every small change can make a difference.

This short course helps you to understand the basics of the green agenda and how to support the environment as businesses and as individuals. We only have one planet Earth that can sustain us, so it is imperative that we do not deplete its resources.

Who would this benefit?

All staff.

The course aim is:

To raise awareness on how to start to create and implement a carbon neutral strategy.

Objectives

- Identify some key environmental issues
- Discuss the benefits of environmental awareness for businesses and individuals
- Take environmentally friendly actions daily at work (and at home)
- Identify procedures that businesses can implement to support the environment on an organizational level

All Workshops are facilitated by an experienced subject expert, rich in content and designed to be insightful and inspiring.

There will be a mix of individual and group work as well as practical case studies to bring the learning to life.

Content

- Understand the terms sustainability and ecological footprint
- Discuss key environmental issues and how they link to business
- Explore the benefits to business of supporting the green agenda

- Identify small changes that help the environment
- Discuss the 3R's and how this impacts business practice
- Create a sustainability checklist
- Identify business procedures that support the environment
- Next steps: Delegates are encouraged to agree how they will apply the ideas they like when they get back to the day job.
